POSXpress3 Food & Beverage System

POSXpress3 is a Windows Point of Sale System designed specifically for the Food & Beverage User powered by a comprehensive Back Office Inventory System.

Extensive menu driven options ensure ease of use.

POSXpress3 offers the user access to a wide range of Touch Screen Splash-proof Equipment from all leading Manufacturers.

Restaurant Booking System.

- POSXpress3 offers easy to use menu driven screens for product selection.
- Assistants can log into the till at the start of each sale using a Swipe card, or Dallas key.
- Assistants can roam between tills and switch between sales.
- Customer Orders can be saved and recalled by Table number.
- A Tab can be set up for Bar customers wanting to keep an open sale.
- Menu items can be created from individual items for full inventory control in the back office.
- Comprehensive and detailed cash management offers tight control and auditing of each till and sales assistant.
- Bookings for Multiple Restaurants can be managed with cover time control.
- Email alerts warn management of till discrepancies or abnormal events such as price overriding.
- Credit / debit Card sales can be linked directly to the bank for authorisation.
- Customers can be issued with Charge Cards for credit sales at the POS units. Credit limits can be pre-authorized and accounts settled with full invoices.
